Paul W Cook, Rolf W Winter and Jeffrey R Brown. Improved, defined, animal origin-free (dAOF) primary isolation and serial propagation of human keratinocytes, human corneal epithelial cells and other clinically-relevant cell types. J. Invest. Derm. Vol 132 supplement 1, p. S147, 2012 Society for Investigative Dermatology (SID) Annual Meeting & May 9 - 12, 2012, Raleigh, NC.

Paul Cook, Rolf Winter, Jeffrey Brown. A new cell culture system for the defined, animal origin-free primary isolation and serial propagation of adult human corneal epithelial cells and adult human corneal fibroblasts. 22nd Annual Meeting of the European Tissue Repair Society, Athens, Greece, October 4–5, 2012. In Wound Rep. and Reg., Vol. 20 (5) p. A89, 2012.

Patents and Patent Applications:

Shipley, Gary D., Pittelkow, Mark R. and **Cook, Paul W.**, Method to assess the ability of a substance to inhibit or stimulate keratinocyte autocrine factor production. United States Patent 5262298; 07/26/1990.

Shiple, Gary D. Pittelkow, Mark R. and **Cook, Paul W.** Keratinocyte autocrine factor. WO/1990/0140; 11/29/1990.

Shiple, Gary D. and **Cook, Paul W.** Keratinocyte-derived conditioned medium as a source of growth factors. WO/1993/004164; 08/28/1991.

Cook, Paul Weldon. Animal product-free cell culture media extracts, supplements, and culture media supplement systems. United States Patent Application 20060094114; 05/04/2006.

SBIR Grant Awards:

Roulet, Chantal Primary Investigator. Purine Analogs as Novel Treatment for Skin Disease. (2004) Contract no. 1R43AI060334-01, to Columbia Biotechnologies Corporation Vancouver WA 98686. \$100,000

Cook, Paul W. Primary Investigator. Cutaneous Polyionic Therapeutics. (2010) National Institutes of Health Contract no. 1R43AR059565-01, to Avantbio Corporation Vancouver WA 98665. \$100,000
